DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
2. I. Claims 1-56⁷ drawn to composition comprising a) film-forming agent and b) at least one compound chosen from C₃ to C₅ monosaccharides substituted with at least one to C₂₂ carbon chain, classified in class 424, subclass 70.11 to 70.17 depending on the nature of the film forming agent. 167-212.7
3. II. Claims 57-116 are, drawn to method for durable non-permanent shaping of at least one keratinous fiber comprising comprising a) film-forming agent and b) at least one compound chosen from C₃ to C₅ monosaccharides substituted with at least one to C₂₂ carbon chain, classified in class 424, subclass 70.11 to 70.17 depending on the nature of the film forming agent.
- III. Claims 117-166 are drawn to method for durable non-permanent shaping of at least one keratinous fiber comprising at least one compound chosen from C₃ to C₅ monosaccharides substituted with at least one to C₂₂ carbon chain, classified in class 424, subclass 70.1.
- IV. Claims 167-212² are, drawn to method for durable non-permanent shaping of at least one keratinous fiber comprising at least one compound chosen from C₃ to C₅ monosaccharides substituted with at least one to C₂₂ carbon chain, classified in class 424, subclass 70.1.

Art Unit: 1615

- V. Claims 213-216 are, drawn to kit for protecting at least one keratinous fiber, classified in class 132, subclass 286+.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process can be not only practiced with the instant composition, but also with group IV product evidenced by applicants themselves.
5. Inventions IV and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process can be not only practiced with the instant composition, but also with group I product evidenced by applicants themselves.
6. Inventions I and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I and IV are unrelated invention. Group I has two components and inventions IV has only one component. The scope of both the groups are different.
7. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different

Art Unit: 1615

functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions II and III are unrelated. Group II has two components and invention III has only one components. The scope of both the groups are different.

8. Inventions I or IV and V are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the kit as claimed can be used for applying skin care composition.

9. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

10. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group III, restriction for examination purposes as indicated is proper.

11. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

12. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1615

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
